

Cryo 21

NATURAL AND PERMANENT FAT REMOVAL WITHOUT SURGERY

A completely new and revolutionary method for removal of excess localized fat and cellulite - **efficiently and profitably**

CRYOTHERAPY IS A NEW AND REVOLUTIONARY METHOD THAT GIVES IMMEDIATE AND LASTING EFFECT!

The Cryotherapy Revolution is finally in Norway. Karolinska Institutet in Stockholm has researched cold treatment (Cryotherapy) of fat cells. Their studies have shown that when administering cold to "white fat", this will promote the growth of blood vessels that converts the white fat to brown fat, which is much easier for body metabolize. Cryotherapy is FDA approved and is completely safe and harmless without any form of side effects. The treatment feels like a cold and pleasing massage.

Our method is completely different from other cryomethods since our cold probe is manually moved in the places it wants to remove fat. Other models is attached to the body with vacuum, but this method often gives burn marks and have a very limited treatment area

ADVANCED TECHNOLOGY

Our method is simply brilliant in that we can treat all areas of the body: Removing countless arms, double chin, abdominal fat and cellulites etc. **Cryo 21** is a therapeutic treatment for removal of fat without surgery. **Cryo 21** creates a thermal shock which reducing the temperature of the fat cells. This process is called apoptosis which resulting in a gradual degeneration and elimination of dead fat cells.

This occurs when the machine reduces temperature in the area from 34 °C to only 8 °C and this without the client feeling any kind of cold. After 4-6 treatments it is not unusual for the client to have lost up to 12 cm around the waist or 5 sizes and this completely permanently without any kind of surgery.

Cryo 21

THIS EQUIPMENT REMOVES YOUR CUSTOMERS UNWANTED FAT - AND INCREASES YOUR PROFITS!

The Cryotherapy treatment takes 20-30 minutes and only costs 120 € per treatment per area. The therapist treats the same place once every 14 days, as it takes approximately 14 days for all the dead fat cells to clear the body.

After 4-6 treatments the desired outcome is typically obtained. If the customer have both abdominal fat, countless arms and dou-ble chin these can be treated independently.

It is advantageous to use a gastric regulating product during the treatment period, like Oxytarm Enzyme.

HIGH LEVEL OF PROFITABILITY

With only three hours of therapy a day (6 customers) the revenues a month will be 18.000 €. Even with only one per hour a day (2 customers) the revenue will be 6.000 € a month. The device costs 18000 € excl. VAT and a leasing or installment plan over five years the finance expenditures will be only around 300 € a month. excl. VAT. This means you only need 2.5 customers a month to pay the device.
